Description	Notes
Baseline for Version 2	
Revised definitions for C82453, C82454, and C82455	No change to code or term
VeDDRA V.10	
14 terms	
Revised definition for C82454 Clinical Studies	No change to code or term
Added "Horse" to species column for HOR143 Yonaguni	No change to code or term
Corrected definition for C38288 Oral	No change to code or term
Removed duplicate terms with blank definitions that were marked as "Inactive"	No change to code or term
Added VeDDRA V.11; marked V.7 and V.6 as Inactive	
Modified term TAIWAN to conform with GENC in NSG Standards Registry	No change to code; term not transmitted in xml

ReleaseDate	See Column E			06/21/2013
<b>CODE</b>	<b>TERM</b>	<b>DEFINITION</b>	<b>SOURCE</b>	<b>STATUS</b>
C82461	SAFETY ISSUE	Any observation in animals or humans, whether or not considered to be product-related that is unfavorable and unintended, excluding suspected lack of expected effectiveness and that occurs after any use of the veterinary medicinal product(s) (off-label and on-label uses). (As defined by VICH GL24 - Management of Adverse Event Reports)	VICH	Active
C82456	LACK OF EXPECTED EFFECTIVENESS	An adverse event in animals that only involves suspected lack of expected effectiveness according to approved labelling after any use of the veterinary medicinal product(s). (As defined by VICH GL24 - Management of Adverse Event Reports)	VICH	Active
C82452	BOTH SAFETY AND LACK OF EXPECTED EFFECTIVENESS	An adverse event in animals that involves both safety issue(s) and suspected lack of expected effectiveness after any use of the veterinary medicinal product(s).	VICH	Active
C17649	OTHER	The actual value is not an element in the value domain of a variable (e.g., concept not provided by required code system).	VICH	Active
C82453	Lack of Expected Effectiveness (Clinical Studies)	A planned study outcome that describes an adverse event or patient response to a veterinary product's failure to treat or cure a specific medical condition or problem	FDA	Active
C82454	Safety Issue (Clinical Studies)	A perceived illness or other injury that occurred in a planned study using a veterinary product, whether or not considered to be product-related and regardless of how or why the VMP is used (off- or on-label).	FDA	Active
C82455	Both Safety and LOEE Issue (Clinical Studies)	A combination of adverse events (safety issue and lack of efficacy) observed in a patient exposed to a veterinary product involved in a planned study	FDA	Active
C82457	Manufacturing/Product Defect Manufacturing Defect (Both Safety and LOEE)	Product defect/manufacturing defect as defined by 21 CFR 514.3 with both a safety and LOEE issue.	FDA	Active
C82458	Manufacturing/Product Defect Manufacturing Defect (LOEE)	Product defect/manufacturing defect as defined by 21 CFR 514.3 with LOEE issue.	FDA	Active
C82459	Manufacturing/Product Defect Manufacturing Defect (Safety)	Product defect/manufacturing defect as defined by 21 CFR 514.3 with suspected safety issue.	FDA	Active

C82460	Manufacturing/Product Defect Manufacturing Defect with no Adverse Events	Product defect/manufacturing defect as defined by 21 CFR 514.3.	FDA	Active

Injection of a medicinal product into the bone marrow of the sternum.	VICH	Active
Administration of a medicinal product into the synovial cavity of the joint	VICH	Active
Administration of a medicinal product into the tendon	VICH	Active
Administration of a medicinal product directly into the testis	VICH	Active
Injection of a medicinal product through the dura to the subarachnoid cavity.	VICH	Active
Administration of a medicinal product directly into the thoracic cavity	VICH	Active
Administration of a medicinal product directly into a tumor	VICH	Active
Administration of a medicinal product to the cavity of the uterus.	VICH	Active
Injection of a medicinal product into a vein.	VICH	Active
Administration of a medicinal product to the urinary bladder.	VICH	Active
Administration of a medicinal product into the rear chamber of the eye.	VICH	Active
A technique of introducing ionic medicinal compounds into the body through the skin by applying a local electric current	VICH	Active
Administration to bath or flush open wounds or body cavities	VICH	Active
Administration of a medicinal product to the laryngopharynx for a local effect (anaesthetics).	VICH	Active
Administration of a medicinal product to the nose to obtain a systemic or local effect. Inhalation therapy intended for the lower respiratory tract is excluded; see inhalation use.	VICH	Active
Veterinary use only Administration of a veterinary medicinal product by dropping it into the eyes and nares of birds.	VICH	Active
Administration of a medicinal product upon the eyeball and/or conjunctiva.	VICH	Active
Taking a medicinal product by means of swallowing.	VICH	Active
Administration of a medicinal product to the oropharynx (throat) to obtain a local effect.	VICH	Active
Route of exposure not otherwise described	VICH	Active
Administration by injection, infusion or implantation. To be used only where the parenteral route has not been specified (e.g., intravenous, subcutaneous etc.) or where a product may have many parenteral routes.	VICH	Active
Veterinary use only Administration of a veterinary medicinal product into the foot of birds.	VICH	Active
Injection of a medicinal product around a joint.	VICH	Active

C38313	VAGINAL

Injection of a medicinal product into the direct surroundings of one or more nerves (commonly used terms by veterinarians include block infiltration and caudal block.)	VICH	Active
Administration to the pouch between the tooth and the gingiva.	VICH	Active
Administration of a medicinal product on the periost	VICH	Active
Administration of a medicinal product to the rectum in order to obtain a local or systemic effect.	VICH	Active
Administration of a medicinal product to the respiratory system by inhalation to obtain a systemic or a local effect in the lower respiratory tract. Nasal use and endotracheopulmonary use are excluded	VICH	Active
Administration of a medicinal product behind the eyeball	VICH	Active
Injection of a medicinal product underneath the conjunctiva.	VICH	Active
Injection of a medicinal product directly underneath the skin.	VICH	Active
Administration of a medicinal product under the tongue to obtain a systemic effect.	VICH	Active
Administration of a medicinal product under the mucosa.	VICH	Active
Veterinary use only	VICH	Active
Administration of a veterinary medicinal product by pouring onto the dorsal midline of the animal or to the top of the head and around the base of the horns.		
Administration of a medicinal product to the skin in order to obtain a systemic effect after passing through the skin barrier, by diffusion.	VICH	Active
Administration of a medicinal product across the placenta.	VICH	Active
An indication that the route of exposure has yet to be assigned.	VICH	Active
Route of exposure not known	VICH	Active
Administration of a medicinal product to the urethra.	VICH	Active
Administration of a medicinal product to the vagina.	VICH	Active

CODE	TERM	DEFINITION	SOURCE	STATUS
C48473	ampule	A dosing measurement based on the ampule unit	VICH	Active
C25397	application	A predetermined amount of medicated gel, paste, ointment, or cream as specified on the product label.	VICH	Active
C62412	applicator	A dosing measurement based on the applicator unit	VICH	Active
C48474	bag	A dosing measurement based on the bag unit	VICH	Active
C48475	bar	A dosing measurement based on the bar unit	VICH	Active
C53495	bead	A dosing measurement based on the bead unit	VICH	Active
C54564	blister	A dosing measurement based on the blister unit	VICH	Active
C61569	blister pack	A dosing measurement based on the blister pack unit	VICH	Active
C53498	block	A dosing measurement based on the block unit	VICH	Active
C48476	bolus	A dosing measurement based on the bolus unit	VICH	Active
C48477	bottle	A dosing unit that contains medicinal substance(s) in the form of a receptacle with a narrow neck designed to accept a specific closure	VICH	Active
C48478	box	A dosing measurement based on the box unit	VICH	Active
C48479	can	A dosing measurement based on the can unit	VICH	Active
C62413	canister	A dosing measurement based on the canister unit	VICH	Active
C48480	capsule	A dosing unit that contains medicinal substance(s) enclosed within a soft or hard shell, usually made from gelatin, starch, or cellulose, or other suitable material	VICH	Active
C54702	carton	A dosing measurement based on the carton unit	VICH	Active
C48481	cartridge	A dosing measurement based on the cartridge unit	VICH	Active
C62414	case	A dosing measurement based on the case unit	VICH	Active
C62274	cello pack	A dosing measurement based on the cello pack unit	VICH	Active
C48483	coat	A dosing measurement based on the coat unit	VICH	Active
C82481	collar	A medication-infused band placed on an animal	VICH	Active
C48484	container	A dosing measurement based on the container unit	VICH	Active
C82482	cryule	An ampoule used to store medications at intense cold	VICH	Active
C54703	cup	A dosing measurement based on the cup unit	VICH	Active
C48489	cylinder	A dosing measurement based on the cylinder unit	VICH	Active
C16830	device	Any physical object that is useful for prevention, diagnosis, or treatment of disease or other conditions	VICH	Active
C62415	dewar	A dosing measurement based on the dewar unit	VICH	Active
C62416	dialpack	A dosing measurement based on the dual pack(synonym dialpack) unit	VICH	Active
C82483	dip	A medicated liquid applied to the entire animal, e.g. by immersion	VICH	Active
C48490	disk	A dosing measurement based on the disk unit	VICH	Active
C25488	dose	A predetermined strength of a biologic	VICH	Active
C62417	dose pack	A dosing measurement based on the dose pack unit	VICH	Active
C48491	drops	A unit of volume used in pharmacy and equal to 0.05 milliliter (20 drops/ml)	VICH	Active
C48492	drum	A dosing measurement based on the drum unit	VICH	Active
C53499	film	A dosing measurement based on the film unit	VICH	Active
C48496	generator	A dosing measurement based on the generator unit	VICH	Active
C48499	implant	A dosing measurement based on the implant unit	VICH	Active
C48501	inhalation	A dosing unit equal to the amount of the medicinal substance(s) delivered via the respiratory tract by one oral or nasal inhalation in the form of a gas, aerosol, mist, liquid, or fine powder using a nebulizer or an aerosol device, or the force of natural	VICH	Active
C62275	inhaler	A dosing measurement based on the inhaler unit	VICH	Active
C62418	inhaler, refill	A dosing measurement based on the inhaler refill dosing unit	VICH	Active
C62276	insert	A dosing measurement based on the insert dosing unit	VICH	Active
C48502	jar	A dosing measurement based on the jar unit	VICH	Active
C62419	jug	A dosing measurement based on the jug unit	VICH	Active
C48504	kit	A dosing measurement based on the kit unit	VICH	Active
C48506	lozenge	A dosing measurement based on the lozenge unit	VICH	Active
C17649	other	Different than the one(s) previously specified or mentioned	VICH	Active
C48520	package	A dosing measurement based on the package unit	VICH	Active
C48521	packet	A dosing unit equal to the amount of medicinal substance(s) contained in a single item of a packet dosage form	VICH	Active
C82484	paper	A medication-infused sheet of material placed on the premises	VICH	Active
C48522	parts	A dosing measurement based on the part dosing unit	VICH	Active

C48524	patch	A dosing unit equal to the amount of medicinal substance(s) contained in a single item of a patch drug delivery system which often has an adhesive backing that is applied to an external site on the body	VICH	Active
C48525	pellet	A dosing measurement based on the pellet unit	VICH	Active
C48530	pouch	A dosing measurement based on the pouch unit	VICH	Active
C62609	ring	A dosing measurement based on the ring unit	VICH	Active
C48536	scoopful	A dosing measurement based on the scoopful unit	VICH	Active
C53502	sponge	A dosing measurement based on the sponge unit	VICH	Active
C48537	spray	A dosing unit equal to the amount of medicinal substance(s) contained in the volume of liquid delivered by the single operation of a spray dosage form container	VICH	Active
C53503	stick	A dosing measurement based on the stick unit	VICH	Active
C48538	strip	A dosing measurement based on the strip unit	VICH	Active
C62420	supersack	A dosing measurement based on the supersack unit	VICH	Active
C48539	suppository	A dosing unit equal to the amount of medicinal substance(s) contained in a single item of a suppository dosage form that is designed for introduction into the orifice of the human body and usually melts, softens, or dissolves at body temperature	VICH	Active
C53504	swab	A dosing measurement based on the swab unit	VICH	Active
C48540	syringe	A dosing measurement based on the syringe unit	VICH	Active
C48542	tablet	A dosing unit equal to the amount of medicinal substance(s) contained in a single item of a tablet dosage form comprising of compressed medicinal substance(s) with or without suitable diluents	VICH	Active
C62421	tabminder	A dosing measurement based on the tabminder unit	VICH	Active
C82486	tag	A medication-infusion product attached to an animal	VICH	Active
C48543	tampon	A dosing measurement based on the tampon unit	VICH	Active
C62422	tank	A dosing measurement based on the tank unit	VICH	Active
C48545	test	A dosing measurement based on the test unit	VICH	Active
C54704	tray	A dosing measurement based on the tray unit	VICH	Active
C48548	troche	A dosing unit equal to the amount of medicinal substance(s) contained in a single item of a discoid-shaped solid oral dosage form containing the medicinal agent in a suitably flavored base	VICH	Active
C48549	tube	A dosing measurement based on the tube unit	VICH	Active
C17988	unknown	Not known, not observed, not recorded, or refused	VICH	Inactive
C17998	unknown	Not known, not observed, not recorded, or refused	VICH	Active
C48551	vial	A dosing measurement based on the vial unit	VICH	Active
C48552	wafer	A dosing measurement based on the wafer unit	VICH	Active

DEFINITION	SOURCE
	VICH
A product that is packaged under pressure and contains therapeutically active ingredients that	VICH
A dosage form containing one or more active ingredients, surfactants, aqueous or non-aqueous	VICH
An aerosol product which utilizes a compressed gas as the propellant to provide the necessary	VICH
A solid dosage form usually in the form of a rectangle that is meant to be chewed.	VICH
A solid dosage form in the shape of a small ball.	VICH
A small sterile solid mass consisting of a highly purified drug intended for implantation in the body	VICH
Solid dosage form, usually in the shape of a square or rectangle.	VICH
A solid pharmaceutical dosage form that contains medicinal agent within either a hard or soft soluble	VICH
A solid dosage form in which the drug is enclosed within either a hard or soft soluble container	VICH
A solid dosage form in which the drug is enclosed within either a hard or soft soluble container	VICH
A solid dosage form in which the drug is enclosed within either a hard or soft soluble container	VICH
A solid dosage form in which the drug is enclosed within either a hard or soft soluble container	VICH
A solid dosage form in which the drug is enclosed within either a hard or soft soluble container	VICH
A solid dosage form in which the drug is enclosed within either a hard or soft soluble container	VICH
A solid dosage form in which the drug is enclosed within either a hard or soft soluble container	VICH

A solid dosage form in which the drug is enclosed within either a hard or soft soluble container	VICH
A solid dosage form in which the drug is enclosed within either a hard or soft soluble container	VICH
A solid dosage form in which the drug is enclosed within a soluble, gelatin shell which is plastic	VICH
A substance that serves to produce solid union between two surfaces.	VICH
A narrow tube filled with material that is capable to burn with release of therapeutically active substance	VICH
A large piece of relatively flat, absorbent material that contains a drug. It is typically used for application	VICH
Matrix impregnated with active substance(s) which is worn around the animals neck. The active substance(s) are released by diffusion by mechanical means or by vaporisation over a period of time.	VICH
A liquid preparation of increased strength and reduced volume which is usually diluted prior to use	VICH
A solid dosage form bounded by a circular base and the surface formed by line segments joining the base	VICH
An ocular system placed in the eye from which the drug diffuses through a membrane or contact lens	VICH
A semisolid emulsion of either the oil-in-water or the water-in-oil type, ordinarily intended for topical use	VICH
A cream dosage form that enhances drug delivery. Augmentation does not refer to the strength of the drug	VICH
A naturally produced angular solid of definite form in which the ultimate units from which it is built are molecules	VICH
The propagation of microorganisms or of living tissue cells in special media conducive to their growth	VICH
A device usually dome-shaped, worn during copulation over the cervical mouth for prevention of pregnancy	VICH
The pharmaceutical dosage form of a flat, circular shape containing solid or powdered medicinal substance	VICH
A liquid preparation, intended for the irrigative cleansing of the vagina, that is prepared from potassium permanganate	VICH

C48193	GENERATOR

A dosage form designed for local administration, usually placed on a pad that will cover the affected area.	VICH
Modern technology, distributed with or as a part of a drug product that allows for the uniform release of a drug.	VICH
A clear, pleasantly flavored, sweetened hydroalcoholic liquid containing dissolved medicinal agents.	VICH
A dosage form consisting of a two-phase system comprised of at least two immiscible liquids (one liquid dispersed in the other).	VICH
A rectal preparation for therapeutic, diagnostic, or nutritive purposes.	VICH
A concentrated preparation of vegetable or animal drugs obtained by removal of the volatile components.	VICH
A slender and elongated solid thread-like substance that delivers drug in such a manner as to allow for the uniform release of a drug.	VICH
A thin layer or coating.	VICH
A drug delivery system in the form of a film that releases the drug over an extended period in solution.	VICH
A thin layer or coating which is susceptible to being dissolved when in contact with a liquid.	VICH
A product, usually a solid, intended for solution prior to administration.	VICH
A product, usually a solid, intended for suspension prior to administration.	VICH
A product, usually a solid, intended for suspension prior to administration; once the suspension is formed, it is intended to be administered.	VICH
Any elastic aeriform fluid in which the molecules are separated from one another and move freely.	VICH
A semisolid (1) dosage form that contains a gelling agent to provide stiffness to a solution or a suspension.	VICH
A combination of a dentifrice (formulation intended to clean and/or polish the teeth, and which may contain a drug) and a drug.	VICH
A gel preparation, with metered dose valves, which allow for the delivery of a uniform quantity of a drug.	VICH
An apparatus for the formation of vapor or gas from a liquid or solid by heat or chemical reaction.	VICH

Also called pellets or pilules, are made of pure sucrose, lactose, or other polysaccharides.	VICH
A slip of skin or of other tissue for implantation.	VICH
A small particle or grain.	VICH
A small medicinal particle or grain to which an enteric or other coating has been applied, thus c	VICH
Uncoated granules generally containing acid substances and carbonates or hydrogen carbonates which react rapidly in the presence of water to release carbon dioxide. They are intended to be dissolved or dispersed in water before administration.	VICH
Modified-release granules showing a slower release of the active substance(s) than that of a conventional-release granules administered by the same route.	VICH
A small medicinal particle or grain made available in its more stable dry form, to be reconstituted	VICH
A small medicinal particle or grain made available in its more stable dry form, to be reconstituted	VICH
A small medicinal particle or grain made available in its more stable dry form, to be reconstituted	VICH
Delayed-release granules that are intended to resist the gastric fluid and to release the active substance(s) in the intestinal fluid, dispersed in an appropriate liquid vehicle to produce a suspension for oral use.	VICH
A mucilaginous excretion from various plants.	VICH
A sweetened and flavored insoluble plastic material of various shapes which when chewed, rel	VICH
Natural mixture of gum and resin, usually obtained as exudations from plants.	VICH
A material containing drug intended to be inserted securely or deeply in a living site for growth,	VICH
A special class of inhalations consisting of a drug or combination of drugs, that by virtue of their	VICH
An injection, which either consists of or forms liposomes (a lipid bilayer vesicle usually composed	VICH
A sterile preparation intended for parenteral use; five distinct classes of injections exist as defined	VICH
An emulsion consisting of a sterile, pyrogen-free preparation intended to be administered parenterally	VICH
A parenteral pharmaceutical dosage form that contains a drug molecularly associated with natural	VICH
A sterile preparation intended for reconstitution to form a solution for parenteral use.	VICH

A specially formulated and shaped non-encapsulated solid preparation intended to be placed in the rumen of ruminant animals and designed to be retained in the rumen to release the active substance(s) at a defined rate over a defined period of time. This may be achieved by erosion, corrosion, diffusion, osmotic pressure or any other suitable chemical, physical or physico-chemical means.	VICH VICH
A device inserted and left in the uterus to prevent effective conception.	VICH
A sterile solution intended to bathe or flush open wounds or body cavities; they're used topically.	VICH VICH
A class of gels--semisolid systems which consist of suspensions made up of either solid or liquid particles dispersed in a liquid medium.	VICH VICH
A packaged collection of related material.	VICH
Material applied to the dental tissue or to the tissue side of a denture to provide biological adhesion.	VICH VICH
A solution or mixture of various substances in oil, alcoholic solutions of soap, or emulsions.	VICH VICH
A waxy solid, usually colored cosmetic, in stick form for the lips.	VICH
A dosage form consisting of a pure chemical in its liquid state. This dosage form term should not be used for solutions.	VICH VICH
A liquid that delivers a drug in such a manner to allow a reduction in dosing frequency.	VICH VICH
A liquid preparation for bathing the skin, or an injured or diseased part, either for a medicinal or cosmetic purpose.	VICH VICH
A lotion dosage form that enhances drug delivery. Augmentation does not refer to the length of time the drug is in contact with the skin.	VICH VICH
A lotion dosage form which has a soap or detergent that is usually used to clean the skin.	VICH
Flat, round solid dosage form containing one or more medications, flavouring, sugar, or other ingredients.	VICH VICH
An aqueous solution which is most often used for its deodorant, refreshing, or antiseptic effect.	VICH
An unctuous, combustible substance which is liquid, or easily liquefiable, on warming, and is so used as a fuel.	VICH VICH

A suspension or emulsion, semisolid (1) dosage form, usually containing < 20% water in volume.	VICH
An ointment dosage form that enhances drug delivery. Augmentation does not refer to the strength of the drug.	VICH
Packing used in medical and dental practice for filling a natural cavity or deep or tunnel preparation.	VICH
A semisolid dosage form, containing a large proportion (20 - 50%) of solids finely dispersed in a liquid.	VICH
A paste formulation intended to clean and/or polish the teeth, and which may contain abrasives.	VICH
An aromatic preparation, often with a pleasing flavor, usually intended to dissolve in the mouth.	VICH
A drug delivery system that often contains an adhesive backing that is usually applied to the skin.	VICH
A drug delivery system in the form of a patch that releases the drug in such a manner that the drug is absorbed through the skin.	VICH
A drug delivery system in the form of a patch which is controlled by an electric current.	VICH
A small sterile solid mass consisting of a highly purified drug (with or without excipients).	VICH
A small sterile solid mass consisting of a highly purified drug (with or without excipients).	VICH
A solid dosage form in which the drug itself is in the form of granules to which varying amounts of a binder are added.	VICH
Matrix impregnated with active substance(s) which is fixed on a device to be worn for example round the animal neck.	VICH
A dose of medicine in the form of a small pellet.	VICH

Substance intended for external application made of such materials and of such consistency as to adhere to the skin.	VICH
A soft, moist mass of meal, herbs, seed, etc., usually applied hot in cloth that consists of a layer of material.	VICH
An intimate mixture of dry, finely divided drugs and/or chemicals that may be intended for external application.	VICH
A powder formulation intended to clean and/or polish the teeth, and which may contain abrasives.	VICH
Powder presented as single-dose or multidose preparations and generally contain acid substances and carbonates or hydrogen carbonates which react rapidly in the presence of water to release carbon dioxide. They are intended to be dissolved or dispersed in water before administration.	VICH
An intimate mixture of dry, finely divided drugs and/or chemicals, which, upon the addition of a liquid, forms a solution.	VICH
An intimate mixture of dry, finely divided drugs and/or chemicals, which, upon the addition of a liquid, forms a suspension.	VICH
Freeze dried fast releasing preparation to be placed on the tongue or alternatively to be dissolved in water before administration.	VICH
A powder dosage form that is situated inside a container that has a mechanism to deliver the powder to the site of application.	VICH
A small circular object with a vacant circular center that is usually intended to be placed on the tongue.	VICH
A liquid used to cleanse by flushing.	VICH
A thick ointment or cerate (a fat or wax based preparation with a consistency between that of a cream and a salve).	VICH
A liquid soap or detergent used to clean the hair and scalp and is often used as a vehicle for the application of other drugs.	VICH
A liquid soap or detergent containing one or more solid, insoluble substances dispersed in a liquid.	VICH
Piece of paper which when lit delivers smoke.	VICH
Stick which when lit delivers smoke.	VICH
Any compound of one or more fatty acids, or their equivalents, with an alkali; soap is a detergent.	VICH
A clear, homogeneous liquid dosage form that contains one or more chemical substances dissolved in a liquid.	VICH
A liquid preparation (i.e., a substance that flows readily in its natural state) that contains one or more drugs.	VICH
A solution for the preparation of an iced saline slush, which is administered by irrigation.	VICH
A solution, which after usually being administered in a drop-wise fashion, forms a gel.	VICH

A solution that forms a gel when it comes in contact with ocular fluid, and which allows for the least irritation.	VICH
A solution which is usually administered in a drop-wise fashion.	VICH
A porous, interlacing, absorbent material that contains a drug. It is typically used for applying ophthalmics.	VICH
A liquid minutely divided as by a jet of air or steam.	VICH
A non-pressurized dosage form consisting of valves which allow the dispensing of a specified quantity of liquid.	VICH
A liquid preparation containing solid particles dispersed in a liquid vehicle and in the form of colloidal particles.	VICH
A dosage form prepared in a relatively long and slender often cylindrical form.	VICH
A long narrow piece of material.	VICH
A solid body of various weights and shapes, adapted for introduction into the orifice of the human body.	VICH
A drug delivery system in the form of a suppository that allows for a reduction in dosage frequency.	VICH
A liquid dosage form that contains solid particles dispersed in a liquid vehicle. Note: This liquid is not a suspension.	VICH
A liquid preparation consisting of solid particles dispersed throughout a liquid phase.	VICH
A suspension which is usually administered in a dropwise fashion.	VICH
A strand or fiber used to hold wound edges in apposition during healing.	VICH
A small piece of relatively flat absorbent material that contains a drug. A swab may also be attached to a string.	VICH
An oral solution containing high concentrations of sucrose or other sugars; the term is also used for a solution containing a drug.	VICH
A solid dosage form containing medicinal substances with or without suitable diluents.	VICH
A solid dosage form containing medicinal substances with or without suitable diluents in a matrix.	VICH
A solid dosage form that contains medicinal substances with or without suitable diluents in a matrix.	VICH
A solid dosage form containing a conglomerate of medicinal particles that have each been individually coated.	VICH
A solid dosage form which releases a drug (or drugs) at a time other than promptly after administration.	VICH
A solid dosage form containing a conglomerate of medicinal particles that have been individually coated.	VICH

A solid dosage form containing mixtures of acids (e.g., citric acid, tartaric acid) and suitable bicarbonates.	VICH
A solid dosage form containing a drug which allows at least a reduction in dosing frequency as compared to a conventional dosage form.	VICH
A solid dosage form that contains medicinal substances with or without suitable diluents and is intended to be dissolved in a liquid.	VICH
A solid dosage form that contains medicinal substances with or without suitable diluents and is intended to be dissolved in a liquid.	VICH
A tablet that forms a solution when placed in a liquid.	VICH
A tablet that prior to administration, is intended to be placed in liquid, where it forms a suspension.	VICH
A solid dosage form containing medicinal substances that have been compressed to form a multiple unit dosage form.	VICH
A solid dosage form containing medicinal substances that have been compressed to form a multiple unit dosage form.	VICH
A solid dosage form, which disintegrates, dissolves or melts quickly (usually within a matter of minutes) in a liquid.	VICH
A solid dosage form containing medicinal substances which disintegrates rapidly, usually within a few minutes, when introduced into a liquid.	VICH
A solid dosage form that contains medicinal substances with or without suitable diluents and is intended to be dissolved in a liquid.	VICH
A solid dosage form that contains medicinal substances with or without suitable diluents and is intended to be dissolved in a liquid.	VICH
Matrix impregnated with active substance(s) which is fixed on a device to be tagged on the animals ear. The active substance(s) are released by diffusion by mechanical means or by vaporisation over a period of time.	VICH
A plug made of cotton, sponge, or oakum variously used in surgery to plug the nose, ear, or vagina, etc.	VICH
A narrow woven fabric, or a narrow extruded synthetic (such as plastic), usually with an adhesive coating, used for the repair of wounds or lacerations.	VICH
An alcoholic or hydroalcoholic solution prepared from vegetable materials or from chemical substances.	VICH
A discoid-shaped solid containing the medicinal agent in a suitably flavored base; troches are prepared in a variety of shapes.	VICH
An indication that the dosage form has yet to be assigned.	VICH
A thin slice of material containing a medicinal agent.	VICH
